Education

Wilfrid Laurier University, Waterloo, ON

Expected Graduation: 2028

Honours Bachelor of Science in Computer Science

Relevant Coursework: Machine Learning, Neural Networks Fundamentals, Cloud Computing, Data Structures, Algorithm Analysis and Design, Software Engineering, Android Programming, Databases, Computer Networks, Internet Computing

Technical Skills

Languages: Java, Python, C, JavaScript, TypeScript, SQL

Frontend: Angular, React, Tailwind CSS, HTML, CSS

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Server-Side Validation

Databases & AI: MySQL, MongoDB, Relational Databases, Anthropic Claude API, LLM Integration

Tools & Platforms: Git, GitHub, Linux, VS Code, Figma, Render, GitHub Projects

Projects

Trackr AI – AI-Powered Academic Management Platform – Founder

Live | GitHub

Angular, TypeScript, Node.js, Express.js, MySQL, Claude API

- Built and deployed a full-stack academic management platform with an Angular/TypeScript and Tailwind CSS front end, a Node.js/Express.js REST API, and a MySQL relational database.
- Integrated the Anthropic Claude API to parse uploaded syllabus PDFs into structured course data, including assignments, due dates, assessment weights, and course details, which students review before saving.
- Implemented secure authentication with JWT-based access control, password hashing and reset, protected routes, user-scoped data access, and server-side validation.
- Delivered end-to-end workflows for courses, assignments, grades, GPA tracking, calendar events, and academic planning; deployed the application on Render.

BiteWise – Full-Stack Meal Recommendation Platform – Group Project

Live | GitHub

React, Node.js, Express.js, MongoDB

- Developed a full-stack meal recommendation application that suggests meals based on dietary restrictions and allergies using React, Node.js, Express.js, MongoDB, and third-party APIs.
- Built responsive reusable React components and implemented JWT authentication, protected role-based routes, and API-driven recipe and restaurant data.

DS-FTP – Reliable File Transfer Protocol over UDP

Java, Networking

- Implemented reliable data transfer over UDP using Stop-and-Wait (RDT 3.0) and Go-Back-N with sliding windows, cumulative ACKs, timeout-based retransmission, and packet sequencing.
- Handled packet loss, out-of-order delivery, and buffering, validating protocol behavior under simulated packet-loss and reordering scenarios.

Experience

Math & Coding Tutor

2024 – Present

Aga Khan Education Board – Tutoring / Summer School

- Teach mathematics and introductory Python to students ages 10–16, adapting explanations and exercises to different learning needs and technical skill levels.
- Design beginner programming activities that strengthen problem-solving, logical reasoning, and computational thinking.

Children & Youth Assistant Coordinator

June 2022 – Present

City of Kitchener

- Coordinate youth programming, communicate with participants and families, and collaborate with staff to keep activities organized in a fast-paced community environment.
- Resolve participant concerns and conflicts while helping maintain a welcoming and inclusive environment.
